## SUMMARY

A creative and inquisitive Computer Science scholar, interested in Data availability, accessibility and analytics, strategic solutions on Information and Communication Technology. I am currently seeking an entry-level opportunity that would allow me to connect today's society with the technology of tomorrow, while simultaneously utilizing my technical skill set, and growing my professional foundation. work with firms, organizations or companies that are looking to make effective use of their data. I accurately measure data, from the first set of idea surrounding it,
